COPEPlus™ HS MB 20:1

COPEPlus™ HS MB 20:1 is a highly loaded, antioxidant concentrate designed to be used in copolyester based engineering grade resins like Hytrel®, Keyflex®, Arnitel®, Skypel® and Kopel®.

Thermal properties:	Value	Test Method
Melting Temperature @ Peak	150-175 ⁰ C	ISO 11357-1/-3
Other properties:	Value	Test Method
Density	1.12+/-0.05	ISO 1183

Delivery form: pellets

Packaging: 50 lbs. Al/foiled bags

Processing: Designed to be added to the Hytrel, Keyflex, Arnitel, Skypel and Kopel types resins using gravimetric feeders during molding, extrusion at 20:1 LDR

COPEPlus™ HS MB 20:1 does not require drying if used right from the sealed bags, otherwise drying is necessary. Recommended drying conditions: 100⁰C for 3 hours. Desired moisture content <0.08%
